Dkt. 62524-A/JPW/ADM

SELECTIVE MELANIN CONCENTRATING HORMONE-1 (MCH1) RECEPTOR ANTAGONISTS AND USES THEREOF

Abstract of the Disclosure

This invention is directed to compounds which are selective antagonists for melanin concentrating hormone-1 (MCH1) pharmaceutical invention provides a receptors. The composition comprising a therapeutically effective amount of the compound of the invention and a pharmaceutically invention provides carrier. This acceptable combining composition made by pharmaceutical therapeutically effective amount of the compound of this invention and a pharmaceutically acceptable carrier. invention further provides а process for combining pharmaceutical composition comprising therapeutically effective amount of the compound of the invention and a pharmaceutically acceptable carrier.

This invention also provides a method of modifying feeding behavior of a subject which comprises administering to the subject an amount of a compound of the invention effective to decrease the consumption of food by the subject. This invention further provides a method of treating a feeding disorder in a subject which comprises administering to the subject an amount of a compound of the invention effective to decrease the consumption of food by the subject. In an embodiment of the invention, the feeding disorder is bulimia, bulimia nervosa or obesity.
